
VICTOR FITZJARRALD

Visiting Instructor

Colorado College · 2013–present · Colorado Springs, CO

Teaching graduate educators keeps product leadership honest—tools only matter if teachers can use them Monday morning.

WHAT I DID

- Taught graduate educational technology courses in a hybrid online/in-person format.
- Designed Google Apps for Education, iPads in Education, and STEM to STEAM experiences.
- Brought current product and EdTech leadership practice back into seminars year after year.

WHAT I LEARNED

- Adult learners need implementable workflows more than vendor feature tours.
- STEM→STEAM is a design problem: making and meaning, not just kit deployment.

OUTCOMES

Visiting instructor since 2013

Google Apps · iPads · STEM→STEAM

Hybrid graduate delivery model
