
VICTOR FITZJARRALD

Technology Coordinator

Korea International School, Jeju · 2013–2015 · South Korea

School technology leadership is people systems—PowerSchool, staff PD, and a team you trust—not a helpdesk queue.

WHAT I DID

- Served as technology director / department chair, supervising six specialists.
- Ran PowerSchool (including YouTube training videos) with Schoology and Google Workspace.
- Delivered staff-wide professional development so platforms became practice.

WHAT I LEARNED

- SIS ownership is change management: videos and PD scale better than one-off desk visits.
- A supervised specialist team beats heroics—clear ownership keeps teachers teaching.

OUTCOMES

Tech department chair · 6 specialists

PowerSchool · Schoology · Google Workspace

Staff-wide PD + YouTube training
