VICTOR FITZJARRALD

Teacher Leader / Technology Director

DC-21, Denver Public Schools · 2011–2013 · Denver, CO

Founding a program means curriculum, makerspace, and CTE pathways—not just teaching your own sections.

WHAT I DID

- Served as a founding lead teacher while teaching secondary science, math, and CTE.
- Built math and science curriculum and supervised the makerspace.
- Created two CTE programs and directed school technology strategy.

WHAT I LEARNED

- Founding lead work is product work early: define the pathway, then staff and tools follow.
- Makerspaces fail without curriculum that gives students a reason to build.

OUTCOMES

Founding lead teacher	Math/science curriculum builder
Makerspace supervision	Two CTE programs created
